NAME Ondagloss

PRODUCT Long-lasting perm treatment.

CAPACITY 1, 2 and 3 in 80 ml 2.71 Fl. Oz. Neutralizer in 100 ml 3.38 Fl. Oz.

HAIR TYPE All hair types.

DESCRIPTION Long-lasting perm treatment. 3 lotions depending on hair type: natural (1), sensitive (2), very sensitive (3) + neutralizer.

DIRECTIONS FOR USE

1. Choose the lotion: analyze the hair type and condition to determine the most suitable perming fluid. If in doubt, choose the gentlest perming liquid.
2. Preparation: wash with shampoo and towel dry, removing excess moisture. Choose the appropriate size hair curlers to create the curl and desired perm.
3. Applying the perming solution: use suitable single-use gloves. Place the curlers: do not roll too tightly. Pour the perming liquid into a non-metallic bowl and apply over the curlers. To guarantee an even application, soak every curler well. Apply at least 80ml over the whole head.
4. Exposure time: strength 1 = 15 minutes, strength 2 and 3 = 10 minutes, covering the entire head with the cap. Do not apply heat.
5. Setting: Rinse the perming liquid thoroughly and remove excess water. Apply at least 100ml over the curlers. Leave on for 10 minutes and unroll the curlers one by one. Gently massage the hair from root to tip. Rinse thoroughly for at least 5 minutes.
